Academic Heraldry

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University. When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture	Maize
Business	Drab
Education	Light Blue
Family Life	Maroon
Engineering	Orange
Humanities, Arts and Social Sciences	White
Natural Resources	Russett

Science Gold-Yellow
School of Graduate
Studies (EdD, PhD) Gold

The white ribbon with the Greek Key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars and a medallion are Mortar Board Senior Honor Society members, the National and Academic & Service Society. A gold braided cord draped over the cowl will distinguish a graduate of Honors.

Hoods

Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

Caps

Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at Old Main and the line of march extends out the new East Wing across the quad to the Library then north to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and the Board of Trustees, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees, with candidates for advanced degrees in the lead and others in groups according to the degrees for which they are candidates. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

Commencement Speaker Honorary Degree

*E*lizabeth Dowdeswell

is a foremost world advocate for enhancing both the natural and social environments. □ As Executive Director of the United Nations Environment Program, she has helped create a shared vision of a future based on sustainable development for people everywhere. □ Since joining UNEP as its director in 1993, she has aggressively led the agency in a newly defined mission of helping nations and peoples "improve their quality of life without compromising that of future generations." From her base in Nairobi, Kenya, where she is also U.N. Under Secretary-General, she has helped attract such global organizations as the World Bank to develop cost-effective, environmentally sound projects in developing countries. She has also spoken throughout the world to raise public awareness of crucial environmental issues including the ozone layer, climate change and biodiversity. □ Before joining the U.N., she was Assistant Deputy Minister at Environment Canada weather, an atmosphere agency of the national government. She has represented Canada at the World Meteorological Organization and on the Great Lakes Water Quality Board. □ In each role she has demonstrated singular negotiating strength and an exceptional ability to build consensus in the face of widely diverse interests. □ For helping to secure the future of our planet, and for enlarging upon the great promise she once showed as a graduate student at Utah State University, the university now confers upon Elizabeth Dowdeswell the honorary degree, **Doctor of Environmental Management.**

Honorary Degree

Arch L. Madsen

is a giant in the world of broadcasting and in the historic struggle to promote democracy in the U.S. and abroad through protecting freedom of the press. □ He was the White House appointee to the international board that oversees Radio Free Europe/Radio Liberty during the 1980s, and played a key role in broadcasting messages of freedom beyond the Iron Curtain that helped end the Cold War. □ Crippled by polio as a young boy, he has lived most of his life in pain. Yet he has found the strength to render tremendous professional, civic and church service. His broadcast experience spans a lifetime--starting at the age of 10 when he constructed a crystal radio at his home near Provo. Today he is known as a leading pioneer of both radio and television. □ In 1961 he became president of KSL-AM-FM-TV in Salt Lake City, raising them to the top-rated stations in the market. He then organized Bonneville International Corporation for KSL's owner, the LDS Church, and added TV and radio stations in major markets across the country. His stations emphasized community service and responsible journalism, and won numerous honors, including broadcasting's highest honor, the coveted Edward R. Murrow Award. □ He has helped lead such organizations as Freedoms Foundation at Valley Forge, the Utah Symphony Orchestra, and the National Conference of Christians and Jews, and has received numerous national and state awards. □ Utah State University is proud to add to these richly deserved honors by bestowing upon Arch L. Madsen the honorary degree, **Doctor of Communications**.

Honorary Degree

*R*ichard D. Rallison

is an inventor, scientist, engineer, entrepreneur and mentor whose vast accomplishments are often unheralded because of his unassuming nature. Through acts of goodwill and collegial discourse, he often gives his best ideas to others. □ He is among the pioneers of laser technology. Bar code scanners, so much in evidence in supermarkets and other businesses, came about because of fabrication technology he developed. The optical holography industry owes its existence to his discoveries and processes. □ He has hired many USU students to work in his development labs and once owned a company that produced millions of high quality display holograms and which helped launch four similar companies. A device he developed taps the potential of virtual reality so people can work in hazardous environments, in fires, in deep wells, in nuclear power generation facilities and in many other places impossible to enter without the magic of real time visualization. □ Much of what this holder of several patents does is so close to the cutting edge of technology, it's difficult to understand or explain. □ Better television pictures in the future may result from polarizing optical elements he has developed. Practically an industry in his own right, he has created a research facility near his home to pursue his many interests in laser and holographic optics. □ For his numerous contributions to science and humanity, Utah State University proudly confers upon Richard D. Rallison the honorary degree, **Doctor of Electro-Optical Engineering.**

Honorary Degree

*B*ernard A. Schriever

*was instrumental in bringing America's military defense system to the high technology pinnacle where it is today. □ From his early entry into the field artillery, followed quickly by service in the Army Air Corps Reserve as a pilot, he was on the flight deck as the Air Force became a separate entity. □ Following distinguished service during World War II as commander of the Far Eastern Air Force Service, he took a keen perception of the potential of new technology into a variety of important jobs. □ He headed scientific liaison, was commander of the Air Force Ballistic Missile Division, commander of air research and development, and retired as commander of the new Air Force Systems Command where he gathered the best scientific minds to help lead the country towards the future of aerospace. □ After 33 years in the Air Force, he became a consultant to industry and government where his expertise continues to play a vital role in the nation's defense. Along with many important assignments, he has found time to chair the Guidance Council for USU's Space Dynamics Laboratories. □ The strength of his contributions to his country can be measured by such plaudits as induction into the Aviation Hall of Fame, the James Forrestal Award, membership in the National Academy of Engineering, honorary fellowship in the American Institute of Aeronautics and Astronautics and numerous honorary degrees. □ It is with great enthusiasm that Utah State University confers upon General Bernard A. Schriever the honorary degree, **Doctor of Mechanical and Aerospace Engineering.***

Honorary Degree

*K*athryn Caine Wanlass

has accomplished an amazing array of good works for all the right, selfless reasons. □ She has blessed the lives of countless individuals through devotion to such causes as helping non-traditional students return to college, and ensuring that senior citizens spend their golden years in comfortable, stimulating surroundings. Her longstanding support of the visual and performing arts has been pivotal in making Cache Valley a cultural cornucopia. Virtually every major arts organization in the community bears her creative and philanthropic imprint. □ While it is not rare for individuals of means to share their good fortune with others, it is rare for someone to do it as Kathryn has—accompanied by countless hours of personal time to ensure that resources are used wisely to benefit the greatest possible number of people. □ Among organizations blessed by her leadership and generosity have been the Marie Eccles Caine Foundation, the USU Women's Center for Lifelong Learning, Sunshine Terrace, the Ellen Eccles Theater, the Capitol Arts Alliance and the Alliance of the Varied Arts. Her loyalty to Utah State University and this community mirrors the lifelong service rendered by her grandfather, John T. Caine II, and her father, George B. Caine. □ For all of her own devoted service, and on behalf of the many thousands of individuals whose lives she has enriched, Utah State University is pleased to confer upon Kathryn Caine Wanlass the honorary degree, **Doctor of Humanities**.

E. G. Peterson Extension Award

Wallace R. Taylor

has been an outstanding Extension Specialist. □ He gave many years of outstanding service to the dairymen of Iowa and Ohio, and for the last 18 years to the dairymen of Utah. He is the author of a one-hundred fifteen page Dairy Herd Improvement testing handbook and senior author of a two-hundred sixty-seven page handbook for reporting DHI information. □ In 1992 Dr. Taylor received the "National Dairy Herd Improvement Association Outstanding Service Award" in recognition of his state, regional and national contributions. □ Although the expertise of Dr. Taylor has been with the record keeping program, he has been called upon in many areas of dairy management. One of his strong points is his ability to communicate with dairymen. Early on he saw the need for education of County Agents and dairymen. This resulted in his involvement in producing and revising the two volume manual on dairying in the west. In recent years he has been instrumental in developing the National Data Base on CD rom. □ For his dedication to service and pride in his job, Utah State University honors Wallace R. Taylor with the 1995 E. G. Peterson Extension Award.

D. Wynne Thorne Research Award

Karl R. White

Professor of Psychology and Special Education, is internationally known as an expert in early identification and early intervention research for children with disabilities. □ As Director of Research and Evaluation at the Center for Persons with Disabilities, he was primarily responsible for the initial and on-going funding to support the Early Intervention Research Institute and the Longitudinal Studies of the Effects and Cost of Early Intervention for Children with Disabilities Project. □ Since 1985, he has received nearly \$10 million of extramural funding to support early intervention research. □ The Institute currently employs approximately 25 professional staff, and 9 longitudinal studies are being conducted in sites across the United States. □ Stemming from his early intervention research and experience working with persons with hearing impairments, Dr. White launched important research concerning techniques for identifying hearing loss in infants. Leading to the development of diagnostic techniques and specific early intervention strategies, this research will potentially assist in the language development of thousands of children with hearing impairments. □ Dr. White has used his extensive academic, research and evaluation background to help build a strong research and evaluation graduate program in the College of Education. He was instrumental in conceptualizing and building the Research and Methodology Program in the Psychology Department and the research and Evaluation Specialization in the College of Education Interdepartmental Doctoral Program. □ Dr. White recently completed an appointment as a Fulbright Scholar in Germany where he conducted research and taught courses on early intervention for children with disabilities. □ Utah State is proud to award Karl R. White the D. Wynne Thorne Research Award.

Eldon J. Gardner Teaching Award

Charles M. Lutz

joined the Business Information Systems and Education Department in 1980. □ Dr. Charles Lutz has had a profound impact on the Business Information Systems program in the College of Business. Throughout his entire teaching career, Dr. Lutz's goals have been to be a master teacher and to help and advise students to the best of his abilities. In 1986, Dr. Lutz received the Robins Award as a Utah State University Advisor of the Year. He presented the USU "Last Lecture" on Scholars Day, 1989. Dr. Lutz has also been a USU Honors Professor and he was International Professor of the Year for Utah State University in 1991. □ He is presently director of the College of Business Honors Program. Dr. Lutz is well-known for his work with students and his classroom teaching expertise. He consistently receives exceptionally high student evaluations for his teaching. Dr. Lutz believes that his first responsibility as a professor in the Department of Business Information Systems and Education at Utah State University is to help students learn. He has designed learning objectives, teaching methods, and a feedback system which ensures that all students are competent at the conclusion of a course. His students describe him as a great motivator and master teacher. Dr. Lutz believes that learning must be interactive, that students are not only required to answer questions in class; they are also required to ask questions. He insists that students turn in projects on time and that all students make a contribution to classroom discussions. □ During the last fifteen years, Dr. Lutz has developed over a dozen courses in the Business Information Systems curriculum, most recently developing a class in global information systems for all business information systems majors. Dr. Lutz also directs the graduate program in the Department of Business Information Systems and Education, which annually graduates from twenty-five to thirty students. Dr. Lutz is a tireless worker who places the interest of the students as his number one priority. □ Utah State University is proud to bestow the Eldon J. Gardner Teaching Award to Charles M. Lutz.

Teaching Excellence Awards

Through an extensive selection process involving both students and faculty in the various academic colleges, eight members of the faculty have been designated for special recognition for excellence in teaching representing the eight colleges of the University: Agriculture; Business; Education; Engineering; Family Life; Humanities, Arts and Social Sciences; Natural Resources; and Science. From among the eight, The Eldon J. Gardner Teaching Award recipient is chosen; the seven remaining follow:

College of Agriculture

Evan P. Parker

has a proven record as an effective, competent, and technically adept teacher since his appointment to Utah State University in 1990. He has taught a wide array of courses both on and off campus, advised undergraduate students, supervised those serving internships in the agricultural mechanization industry, and given leadership to a complex vocational program in mechanization. He has complete competence in both the theory and the practice of complex, electrical hydraulic, and mechanical systems. He is equally adept at teaching both "gifted" and "challenged" university students. He has recruited and advised a number of straight A students of gifted, intellectual capacities. He has also worked equally hard to ensure the success of less talented students. All students regardless of their abilities consistently rank Evan with the highest student evaluations in the Department of Agricultural Systems Technology and Education and the College of Agriculture. He is sought after as a teacher and consultant to the multi-million dollar agricultural mechanization industry.

College of Education

Richard S. Knight

has long been recognized as a dynamic, effective teacher in the Department of Secondary Education, where he specializes in social studies methods. In the land-grant tradition, he has taught over 60 extension classes in addition to his full-time campus assignment since coming to USU in 1968. Dr. Knight's "Models of Teaching" course and his doctoral-level seminar, "Teaching/Learning Foundations," are often praised by graduate students as outstanding offerings that integrate theory and practice. His classroom prowess and mentoring skills earned him the Teacher of the Year Award from the College of Education in 1977. Because of his good humor, real-world savvy, and encyclopedic knowledge of the research on cognitive psychology and teaching effectiveness, he is called upon each year to serve as a key presenter in the University's program to train teaching assistants.

College of Engineering

Kay D. Baker

joined the faculty of the Electrical and Computer Engineering Department in 1970, forming the Space Science Laboratory. He is respected by both faculty and students. He explains concepts in a way that students can understand. He willingly takes time to discuss material that goes beyond what is being covered in the classroom. Faculty members know of his concern for making sure that students get the best exposure to material they need to know, and he is not willing to compromise student learning for other considerations. Dr. Baker has worn many hats at Utah State; such as teacher, researcher, department head, and director. He received the Electrical Engineering Department's outstanding teaching award four times, he received the outstanding researcher of the College of Engineering in 1980, and the highest research award for Utah State, the D. Wynne Thorne in 1985.

College of Family Life

Lori A. Roggman

joined the faculty of the Department of Family and Human Development in 1990 after several years of involvement with research projects studying children and programs serving them. Her approach to teaching has been refined every quarter, keeping it fresh and "alive" by designing creative projects for students that require the integration of concepts with experiential learning and communication skills. She has written interactive computer programs to teach critical thinking about policy issues related to children and to provide research training. She provides careful mentoring of individual students, helping them identify their strengths and finding opportunities to build on those strengths. She sets high standards for herself, encourages her students to set high standards for themselves, and enjoys the process of helping students meet those standards of excellence.

College of Humanities, Arts and Social Sciences

Richard Sherlock

joined the faculty in 1985. Revered by his students and respected by his colleagues as a stimulating, effective teacher, Dr. Sherlock was selected to deliver the 1993 "Last Lecture" by students in the university's honors program--a recognition highly sought by campus faculty. With a background in religion, philosophy, and bioethics, he earned the college's Researcher of the Year award in 1987 and an award for outstanding teaching from the Liberal Arts and Sciences faculty in 1992. Sherlock is credited with forming the new "Matter and Spirit" cluster in the Liberal Arts and Sciences program. He holds a PhD degree from Harvard University and is the author of several books on philosophy and public policy. His reputation for teaching and his ability to motivate learners to think deeply and critically extends broadly across the college and the university.

College of Natural Resources

Helen Ruth Aspaas

joined the faculty of the Department of Geography and Earth Resources in 1992. She is highly esteemed by her colleagues, students, and advisees, and is a tireless and enthusiastic contributor to the faculty. She is active as a researcher on gender and women's issues in Africa, and she uses her expertise to bring her own experience base into the classroom to make the geographical concepts come alive. Her self-defined role is to serve as a conduit to help all students reach their highest academic potential. In the words of her department head, "She brings candor, diversity, expertise, and knowledge to both the classroom and colleague associations, making her an invaluable member of the College of Natural Resources and Utah State University."

College of Science

Michael P. Windham

joined the faculty of the Department of Mathematics and Statistics in 1970. While trained as a mathematician, Mike became actively involved in the statistics program when the departments were merged and is now one of the few teachers who is equally comfortable in either field. Mike has the highest of expectations of students and in fairness equal measure of himself. Never one to be satisfied with a status quo comfort level, Mike has continually worked to be a more effective and creative teacher. All students who thirst for a deep understanding of mathematics and statistics and the accompanying joys of discovery find Mike to be a well of pure spring water. Fundamental understanding has been his objective and long is the list of students who have found that pearl in his classes.

Graduate Studies

James P. Shaver
Dean

Doctor of Philosophy

Abdel-Motaleb, Alaa A.
Cairo, Egypt

MS: Utah State University, 1989
Major: Civil and Environmental Engineering
Major Professor: Dr. Loren R. Anderson
Dissertation: Three-Dimensional Finite Element Analysis of Underground Steel Storage Tanks

Akbar, Ghulam
Chakwal, Pakistan

MS: University of Peshawar, 1986
Major: Range Science
Major Professor: Dr. Christopher A. Call
Dissertation: Dungpat Microenvironmental Effects on Germination and Establishment of Crested Wheatgrass

Awada, Salam Mahmoud
Tyr, Lebanon

MS: Utah State University, 1991
Major: Soil Science
Major Professor: Dr. Jerome J. Jurinak
Dissertation: The Interaction of Lead, Zinc, and Cadmium with Calcite and Millville Silt Loam Soil

Balaji, Rajagopalan
Madras, India

MS: Indian Statistical Institute, 1991
Major: Civil and Environmental Engineering
Major Professor: Dr. David S. Bowles
Dissertation: Nonparametric Stochastic Generation of Daily Precipitation and Other Weather Variables

Barr, David Peter

Colorado Springs, Colorado
BS: Western State College, 1990
Major: Toxicology
Major Professor: Dr. Steven D. Aust
Dissertation: Free Radical Reactions Catalyzed by Lignin Peroxidase

Burns, James William
Brea, California

BS: Western Washington University, 1985
Major: Chemistry
Major Professor: Dr. Stephen E. Bialkowski
Dissertation: Examination of the Heterogeneity of Molecular Interactions at Octadecylated Chromatographic Surfaces Using Relaxation Kinetics and Fluorescence Probe Techniques

Burns, Robert M.
Baker, Montana

BS: Grinnell College, 1989
Major: Chemistry
Major Professor: Dr. John L. Hubbard
Dissertation: Synthesis, Structure and Reactivity of Nitrosyl and Thionitrosyl (η^5 -cyclopentadienyl)Ru(II) Complexes

Burns, Teresa Ellen
Rockaway, New York

BS: New York University, 1988
Major: Physics
Major Professor: Dr. John R. Dennison
Dissertation: Asymmetric Adsorbate and Substrate Interactions in Physisorbed Systems: N₂ on Graphite and Dipolar Molecules on Ionic Substrates

Chang, Tsangyao
Hualien, Taiwan

MS: East Tennessee State University, 1991
Major: Economics
Major Professor: Dr. Christopher Fawson
Dissertation: An Application of ARCH and GARCH Modelling on Taiwan's Time Series Data: Three Essays

Chao, Chien-Chung
Taipei, Taiwan

BS: National Tsing-Hua University, 1987
Major: Biochemistry
Major Professor: Dr. Ann E. Aust
Dissertation: The Participation of Oxygen Radicals and Iron in Crocidolite-Dependent Biochemical and Biological Activities

Choi, Hoon
Seoul, Korea

MS: Utah State University, 1990
Major: Education
Major Professor: Dr. Thomas Hilton
Dissertation: Management Information Systems Faculty Perceptions and Use of Electronic Mail

Chou, Jaching
Keelung, Taiwan

MS: Utah State University, 1992
Major: Civil and Environmental Engineering
Major Professor: Dr. Wende A. O'Neill
Dissertation: Evaluation of Pavement Distress Images Using Artificial Neural Networks

Cooper, Grant S. Jr.
Roy, Utah

MS: Utah State University, 1988
Major: Biological and Agricultural Engineering
Major Professor: Dr. Richard C. Peralta
Dissertation: Optimal Containment and Recovery of Light Hydrocarbons in Contaminated Unconfined Aquifers

Cordero-Brana, Olga Ivette
Bayamon, Puerto Rico

MS: University of Iowa, 1989
Major: Mathematical Sciences
Major Professor: Dr. Adele Cutler
Dissertation: Minimum Hellinger Distance Estimation for Finite Mixture Models

Craig, Douglas E.
Idaho Falls, Idaho

MS: Utah State University, 1993
Major: Psychology
Major Professor: Dr. Susan L. Crowley
Dissertation: The Relationship Between Depression, Anxiety, and the Personality Traits of Dependency and Self-Criticism

Cunningham, Thomas Henry
Provo, Utah

MA: Brigham Young University, 1986
Major: Education
Major Professor: Dr. Ron J. Thorkildsen
Dissertation: Effects of Combining Case-Based Instruction and Mindfulness Activities on the Acquisition, Application, and Transfer of Complex Knowledge: An Experimental Comparison of Two Multiple-Case Treatments

Cutler, Scott Vernon
Bountiful, Utah

MS: Utah State University, 1992
Major: Psychology
Major Professor: Dr. Elwin C. Nielsen
Dissertation: Gender and Depression: Analysis of the Mediating Effects of Sex Roles, Sex-Role Self Discrepancy, and Attributional Style

Daza, Oscar H.
Palmira, Colombia

MS: Agricultural University, Netherlands, 1983
Major: Agricultural and Irrigation Engineering
Major Professor: Dr. Richard C. Peralta
Dissertation: A Prototype Simulation/Optimization (S/O) Model for Conjunctive Water Management Via Embedding Method

Dinnebeil, Laurie A.
Sylvania, Ohio

MAT: Augustana College, 1983
Major: Special Education
Major Professor: Dr. Sarah Rule
Dissertation: Examining the Effects of a Self-Study Package on Teachers' Use of Coincidental Teaching in Preschool Classrooms

Dobson, Brent Neeley
Logan, Utah

MS: Mississippi State University, 1988
Major: Nutrition and Food Sciences
Major Professor: Dr. Daren P. Cornforth
Dissertation: Effects of Nonfat Dry Milk, Whey Protein Concentrate, and Calcium Caseinate on Color and Texture of Turkey Rolls

Ejaz, Muhammad Shafqat
Karachi, Pakistan

MS: Ned University of Engineering and Technology, 1990
Major: Biological and Agricultural Engineering
Major Professor: Dr. Richard C. Peralta
Dissertation: Simulation/Optimization Models for Surface Water Quality Management and Conjunctive Water Use

Emerson, Ellen Neola

Las Vegas, Nevada

MA: Michigan State University, 1985

Major: Psychology

Major Professor: Dr. David M. Stein

Dissertation: The Efficacy of a

Self-Administered Cognitive Behavioral

Treatment Program for Body Image

Dissatisfaction in Women with Subclinical

Bulimia Nervosa

Gonzalez, Sixto A.

Yaburoa, Puerto Rico

BS: Universidad de Puerto Rico, 1988

Major: Physics

Major Professor: Dr. Bela G. Fejer

Dissertation: Radar, Satellite, and Modelling

Studies of the Low Latitude Protonosphere

Hekmat, Sharareh

Khoramabad, Iran

MS: Utah State University, 1991

Major: Nutrition and Food Sciences

Major Professor: Dr. Donald J. McMahon

Dissertation: Effects of Iron Fortification on

Microbiological, Chemical, Physical and

Organoleptic Properties of Yogurt

Hosten, Paul Eric

Port Elizabeth, South Africa

MS: University of Natal, 1989

Major: Range Ecology

Major Professor: Dr. Neil E. West

Dissertation: Assessing the Relative Utility of

Models of Vegetation Dynamics for the

Management of Sagebrush-Steppe Rangelands

Ibarra-Flores, Fernando

Coahuila, Mexico

MS: University of Arizona, 1984

Major: Range Science

Major Professor: Dr. Jerry R. Cox

Dissertation: A Comparison of Climatic and

Edaphic Conditions at Buffelgrass Seeding

Sites in North America and at Seed Collection

Sites in Africa

Islam, Mohammad Nazrul

Cambridge, Massachusetts

MS: Concordia University, 1991

Major: Civil and Environmental Engineering

Major Professor: Dr. Prianka N. Seneviratne

Dissertation: Determination of Optimum

Horizontal Curvature

Jardaneh, Isam Ghaleb

Nablus, Palestine

MS: University of New Castle, 1988

Major: Civil and Environmental Engineering

Major Professor: Dr. Thomas H. Fronk

Dissertation: Cap Model and Finite Element

Applications for Modeling Geological Materials

Jayyousi, Enan Fakhri

Tulkarm, Israel

MS: Jordan University, 1990

Major: Civil and Environmental Engineering

Major Professor: Dr. David S. Bowles

Dissertation: Evaluation of Flood Routing

Techniques for Incremental Damage

Assessment

Jones, Martin Harrison

River Falls, Wisconsin

MS: Utah State University, 1990

Major: Electrical Engineering

Major Professors: Dr. Kay D. Baker and Dr.

Doran J. Baker

Dissertation: The Hereford Ranch Algorithm:

An Improvement of Genetic Algorithms Using

Selective Breeding

Kim, Yi-Kyung

Chung-nam, Korea

MS: Utah State University, 1989

Major: Physics

Major Professor: Dr. V. Gordon Lind

Dissertation: Measurement of the Half-Life,

Delayed Neutron Emission Probability,

Delayed Neutron Average Energy, and

Delayed Charged Particle Energy Spectrum for

Very Neutron Rich Helium Through Sodium

Nuclides

Kim, Yong U.

Seoul, Korea

MS: University of Nevada, Las Vegas, 1988

Major: Special Education

Major Professor: Dr. Alan M. Hofmeister

Dissertation: The Development and Validation

of a Special Education Intelligent

Administration Support Program

Kuntanapreeda, Suwat

Bangkok, Thailand

MS: Utah State University, 1992

Major: Mechanical Engineering

Major Professor: Dr. R. Rees Fullmer

Dissertation: Stable Neural Network Control

Systems

Liang, Kyminh

Taipei, Taiwan

MS: Utah State University, 1990

Major: Electrical Engineering

Major Professor: Dr. Richard W. Harris

Dissertation: Adaptive Vector Quantization on

Image Sequence Coding

Mahmoud, Sahar Fattouh

Gaza, Palestine

BS: United Arab Emirates University, 1987

Major: Chemistry

Major Professor: Dr. Stephen E. Bialkowski

Alma Mater Hymn

COMPOSED BY THEODORE M. BURTON

Across the quad at eventide the shadows softly fall,
The tower of Old Main appears and peace rests
over all.

The lighted "A" upon the hill stands out against the
blue;

Oh, Alma Mater, Utah State, my heart sings out
to you.

And through the years as time rolls on and student
friendships grow,

We'll ne'er forget the joys we had, those days we
used to know,

Thy mem'ries ever will be new, thy friends be ever
true.

Oh, Alma Mater, Utah State, my heart sings out
to you.

Alma Mater Hymn

COMPOSED BY THEODORE M. HUKTON

Across the quad as evening shadows softly fall

The tower of Old Main appears and grows a part
Of all

The lighted way upon the hill winds out against the
blue

O! Alma Mater, hush, hush, we hear you out
to you

And through the years as time rolls on and students
friendships grow

We'll ne'er forget the joys we had, those days we
used to know

The memories ever will be true, the friends be ever
true

O! Alma Mater, hush, hush, we hear you out
to you
